

Mathematical Expertise and Excellence Program – address to the first graduates

The look of understanding on a student's face when they have that 'Eureka' moment is something that teachers live for. Our CEO, David de Carvalho, says, "there is nothing like it". These are the moments that have been experienced by the first teachers to complete the Sydney Catholic Schools (SCS) Mathematical Expertise and Excellence Program.

The program is an innovative way to reimagine professional development in our teaching of mathematics so that we 'fan the flames of wonder' in our students.

Read more about it in David's [speech to the graduating teachers \(PDF 177 kb\)](#).

Want to know what teachers think about what they are teaching?

The review of the Foundation – Year 10 Australian Curriculum is now well underway. ACARA's CEO, David de Carvalho, has been visiting 24 primary schools across Australia, one from each sector in each jurisdiction, to hear from teachers about their experience. [Click here](#) to view this video to hear about the top issues that are emerging on the Australian Curriculum.
